

**STOP**  
What if you were no longer allowed to carry the **SMART PHONE** you chose.

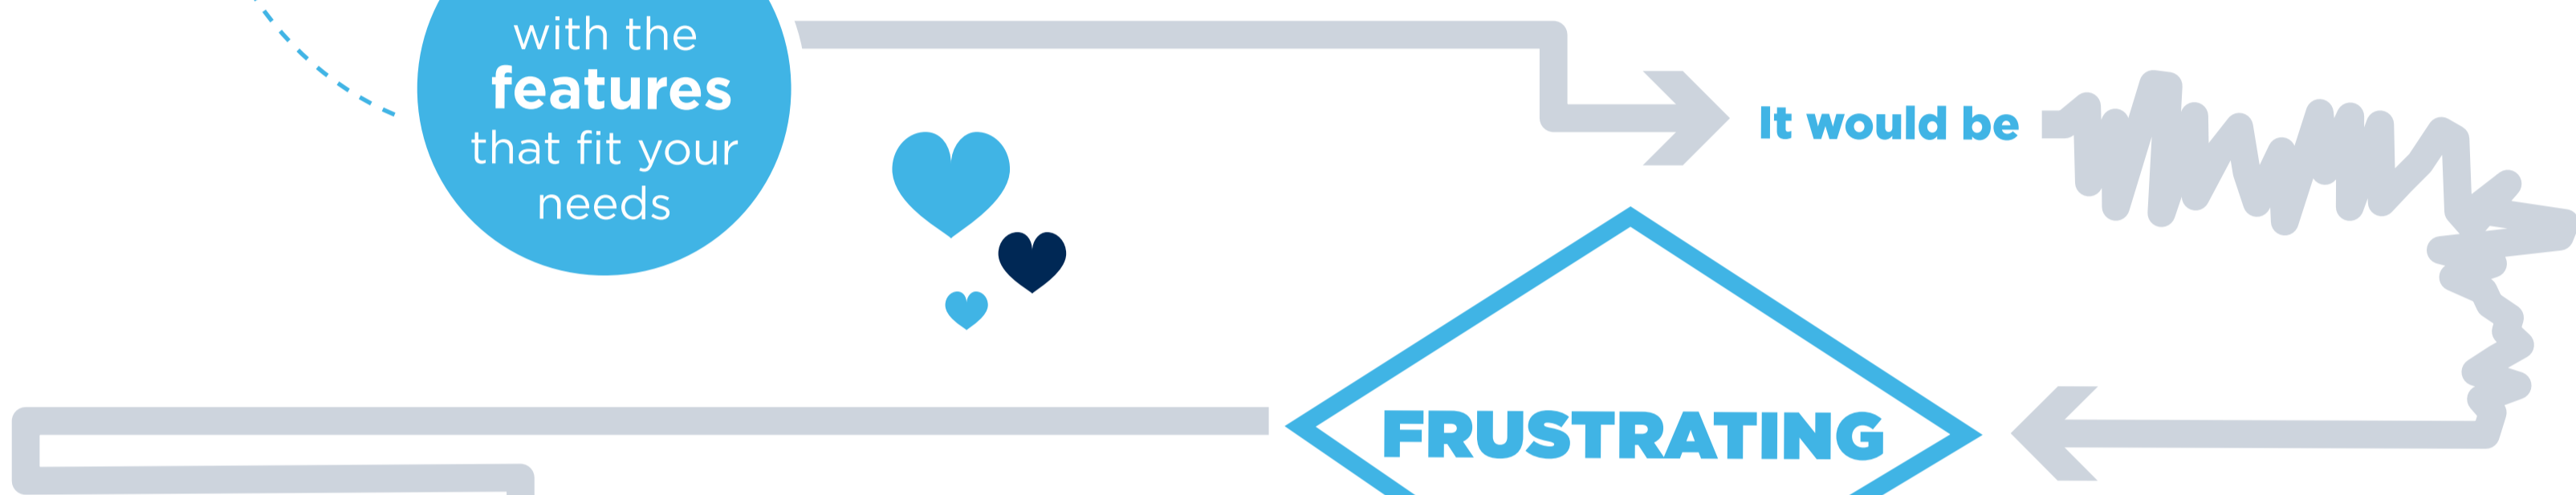

The one you've had for **ages**

The one you feel comfortable with

The one you love

The one with the **features** that fit your needs

**1.25M**  
**AMERICANS HAVE TYPE 1 DIABETES**  
People with T1D must regularly monitor their blood sugar and inject or infuse insulin through a pump.

It would be

**FRUSTRATING**

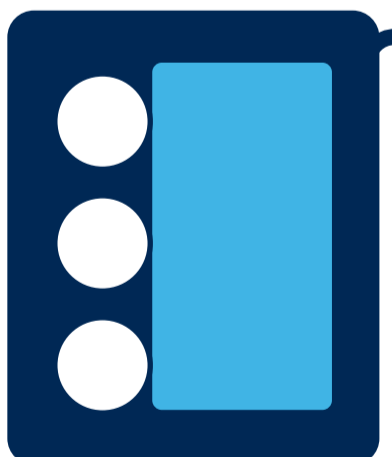

Now imagine it wasn't your phone, but your **INSULIN PUMP**

The one you love

The one you've had for **ages**

The one with the **features** that fit your needs

The one you feel comfortable with

More than frustrating, it may be

**LIFE THREATENING**

**You should choose the insulin pump that's best for you—not your insurance company.**

If an insulin pump was like your cell phone, this policy would be annoying but not dangerous. But insulin pumps are sophisticated medical devices that save lives. Join JDRF to tell insurance companies that people with diabetes and their doctor should decide which pump is best for them.
